REMAINDER OF FORM TO BE COMPLETED BY MEDICAL FACULTY REVIEWER

SECTION I: OVERVIEW AND TIMELINE OF KEY POINTS

The information you provide in this form is vital to our claim team's understanding of the care rendered by the defendant. Your opinions significantly inform the claim strategy, and we appreciate your time, effort, and expertise. To ensure a quality review, please:

- Be objective. Avoid hindsight bias based on the outcome or the severity of an injury; the result of a case should not influence your evaluation of the provider's actions.
- Be honest. Resist defending substandard care. A truthful, unbiased assessment is critical. If care was exceptionally good or bad, acknowledge it.
- Be thorough. Please complete all sections and provide additional relevant details where applicable.

NOTE: If at any point during your review, more information is needed to render an opinion, please **STOP** and immediately notify the MagMutual contact listed on page 1.

QUESTION

RESPONSE

1. Did you receive all the records (including medical records, lab results, imaging, etc.) and pertinent documents (e.g. policies) needed to complete this review?

☐ Yes ☐ No

If **No**, **STOP** and notify the MagMutual contact listed on page 1.

2. What role did the defendant play in the care of this patient?
Select all that apply.

- ☐ defendant had a primary role in managing the patient ("primary" refers to level of responsibility, not specialty – i.e., not primary care)
- ☐ defendant was a consultant
- ☐ defendant served in a supervisory role (includes supervision of students, residents, PA, NP, CNM, etc).
- ☐ defendant is a group, hospital, or other healthcare facility
- ☐ other

Briefly describe the defendant's role

3. Is any key information missing or incorrect from the timeline you were provided?

☐ Yes ☐ No ☐ No timeline was provided

If **Yes**, what information was missing or incorrect? If **no timeline was provided**, please include a timeline outlining the key medical events relevant to this case and this defendant.

SECTION II: DEGREE OF INJURY

QUESTION

RESPONSE

1. Based on your review, please describe the injury the patient incurred:

2. Please select the degree of injury alleged and the degree of injury suffered. In the event a patient has multiple injuries, rate the most severe injury and discuss any other injury in Question 'C' below. As a reminder, be objective and avoid hindsight bias. Your rating of the degree of injury should not be influenced by your opinions of the quality of care or causation and vice versa.

INJURY SEVERITY SCALE REFERENCE

- | | |
|---|---|
| <p>1 No physical injury occurred; there were only emotional injuries such as fright, a claim of wrongful confinement to a mental hospital, etc.</p> <p>3 Relatively minor injuries where recovery is complete but delayed; infections; missed fractures that heal with acceptable results; delay in diagnosing appendicitis without complications.</p> <p>5 Injuries that are permanent in nature but non-disabling and do not generally compromise the basic ADLs; removal of bowel due to circulatory compromise; loss of one ovary or one testicle; loss of fingers or toes, etc. OR a neurological injury resulting in slight disability, possibly not able to carry out all previous activities, but able to look after own affairs without assistance.</p> <p>7 Severe permanent injury; loss of two legs as opposed to one; paraplegia; severe and visible disfigurement; total blindness; permanent renal failure; permanent colostomy; aseptic necrosis of a femoral head, etc. OR a neurological injury requiring assistance to walk and attend to bodily needs.</p> <p>9 Death of the patient</p> | <p>2 Very slight, if any physical injury at all; lacerations; contusions; minor scars. Limited medical treatment required with no delay in recovery.</p> <p>4 Serious temporary injuries where there was a delay in recovery with complication; temporary colostomy; temporary ventilator support; internal injury like bowel perforation with recovery, etc.</p> <p>6 Injuries that are permanent and affect ADLs; deafness; loss of one limb or one eye; loss of one kidney or one lung; permanent foot or wrist drop; failure to diagnose cancer without evidence of spread, etc. OR a neurological injury with moderate disability; requires some help, but able to walk without assistance.</p> <p>8 Most significant injuries where patient survives but has fatal prognosis or requires lifelong care; severe brain damage; CP; quadriplegia; major burns; failure to diagnose cancer with evidence of spread and a poor prognosis, etc. OR a neurological injury resulting in being bedridden, incontinent and requiring constant nursing care and attention.</p> |

3. Please discuss the impact the injury will have on the patient and/or Plaintiff.

4. If you checked different boxes in the "Degree of Injury Alleged" and the "Degree of Injury Suffered" columns, please comment specifically on your reasoning regarding the difference in degrees.

SECTION III. DETAILED CASE EVALUATION

This section includes an assessment of 5 phases of care applicable to *most* patient encounters. Some sections or questions may not be relevant to a claim (“Not Applicable”), and some information may not be discernable from the medical record (“Unclear”). Please provide as much accurate, relevant, and detailed information as possible to enhance the claim analyst’s understanding of the case, including what information is missing, if any, when your answer is “unclear”.

Note: When responding to the below questions, Degree of Injury (DOI) does not imply the Standard of Care or Causation. It's possible for the Standard of Care to be of high quality and the Causation to be very good, and yet the Degree of Injury could be severe, including major permanent harm or even death. Conversely, even when the Standard of Care and Causation are significantly lacking, the Degree of Injury might be minimal. This distinction highlights that the severity of an injury does not directly correlate with the quality of care or show a causal relationship.

The selections you can choose from below are based on your responses throughout this form. As mentioned at the start of the form, the information you provide in this form is vital to our claim team's understanding of the care rendered by the defendant. Your opinions significantly inform the claim strategy.

STANDARD OF CARE

Note: When responding to the below questions, Degree of Injury (DOI) does not imply the Standard of Care or Causation. It's possible for the Standard of Care to be of high quality and the Causation to be very good, and yet the Degree of Injury could be severe, including major permanent harm or even death. Conversely, even when the Standard of Care and Causation are significantly lacking, the Degree of Injury might be minimal. This distinction highlights that the severity of an injury does not directly correlate with the quality of care or show a causal relationship.

The SOC is the care, skill, and treatment recognized as pertinent by similar, reasonably prudent health care providers. It is determined in the context of all relevant circumstances and available information. SOC serves as the benchmark in assessing the appropriateness of the provider's actions, including both direct patient care and in the supervision of or formal collaboration with other providers.

Conceptually, the standard of care is a continuum, ranging from that which is minimally required to that which is exceptional. Accordingly, to meet the standard, a provider's care, at the very least, must be considered acceptable; otherwise, it is negligent care. The standard in any given situation is influenced by several factors, including but not limited to statutes, regulations, clinical guidelines, research, and facility policies and procedures.

Based on your thorough assessment, provide a final rating of the standard of care.

1. SELECT ONE

- ☐ 1. The defendant's actions (or inactions) deviated from acceptable standards to an unquestionable degree.
- ☐ 2. The defendant's actions (or inactions) differed from that which most members of the medical community would have utilized.
- ☐ 3. Standard of Care cannot be determined due to the need for additional information
- ☒ 4. The defendant's actions (or inactions) would be viewed as acceptable by most members of the medical community.
- ☐ 5. The defendant's actions (or inactions) were unquestionably consistent with accepted medical practice.

2. If faced with the same circumstances as this defendant, what would most providers have done?

CAUSATION

Causation reflects whether a provider's actions (or inactions) caused or contributed to an injury. Causation is not dependent on whether the Standard of Care was met. For example, a patient presents with 3 days of left-sided weakness and the physician fails to diagnose cerebrovascular accident, but the onset of symptoms is further out than any emergent treatment window. Therefore, the physician has not met the SOC for missing the diagnosis of CVA, but the defendant's actions did not cause or contribute to the injury because thrombolytics and thrombectomy are no longer indicated by the time the patient presents. Thus, a timely diagnosis or any treatment rendered would not have changed the patient outcome.

Based on your thorough assessment, please indicate your final opinion as to whether the defendant's care caused or contributed to the patient's injury.

1. SELECT ONE

- ☐ 1. The defendant's actions (or inactions) clearly caused and were the sole source of the injuries.
- ☐ 2. The defendant's actions (or inactions) were not the sole cause but did contribute to the injuries.
- ☐ 3. Causation cannot be determined due to the need for additional information
- ☐ 4. The defendant's actions (or inactions) were not the primary cause but may have contributed to the injuries.
- ☐ 5. The injuries were not caused by any of the actions (or inactions) of the defendant.

CLOSING THOUGHTS

QUESTION

RESPONSE

1. Are there any widely accepted clinical decision tools (i.e., algorithms, protocols, checklists) that you use in your daily practice which informed your opinion(s) in this case?

☐ Yes ☐ No

If **Yes**, please list. Please do not conduct a literature search unless specifically instructed to do so by the Claims Analyst assigned to this case

2. Was the care exceptional?

☐ Yes ☐ No

If **Yes**, please describe the key factors/practices that went well.

3. Was there anything about the care that was outside of your area of expertise?

☐ Yes ☐ No

If **Yes**, explain

4. Please set forth any additional information, comments or observations, which you believe may be helpful to. (A) Our understanding of any aspect of the medical care provided; (B) Our understanding of the damages alleged. Please focus your comments on the medicine and avoid any language like "I would settle this claim" or "this is defensible" because that may be construed as legal advice.
